

PERSONAL EMERGENCY RESPONSE SYSTEMS (PERS)

Independence at Your Fingertips

For over 30 years, Consumer Direct Care Network has provided in-home care assistance and superior customer service in every county throughout Montana.

Staying connected can be challenging for people who live on their own. Did you know 40% of nursing home admissions and 25% of hospital admissions are fall related? Stay safe and go anywhere with confidence using our range of personal alert systems!

A Personal Emergency Response Systems (PERS) system provides you with peace of mind with options available at home or on the go:

- Customizable contact list for emergencies
 - ◆ Build your call list to include who you want contacted and in what order
- Discreet, with several wearable options
- GPS capable
- Fall detection
- 24/7/365 monitoring
- Trained, caring response team
- Long battery life

You are a valued member of your community and we help you stay involved.

Call us today for a safer more independent tomorrow!

Helping you live the **life you choose**

Our Personal Emergency Response Systems (PERS) help you maintain independence and provides simple, fast access to help 24 hours a day, 365 days a year

PERS works in three easy steps to keep you protected.

1. Press Your PERS Alert Help Button

All devices have clear, easily pressed buttons that connect with a Personal Emergency Response Expert in seconds. Trained experts are available 24/7 and are based in the United States.

2. Connect with Our Emergency Monitoring Center

When a fall is detected or you press the button on your PERS device, an expert will assist you immediately and assess whether you need emergency help or not.

We know not every situation is an emergency. If you just need a little help, our trained experts will alert a person in your contact list, so you can get the right help quickly.

3. Receive Immediate Assistance

Help is on the way!

If you can't be heard through your device, your designated phone number will be called to confirm your well-being.

If you still can't be reached, the next step will be contacting a loved one from your call list or, sending emergency medical services to ensure your safety.

Take the first step towards ensuring you're protected for whatever life has in store.
